

Subgenus Microdota Mulsant & Rey, 1873

Table with columns for species names (e.g., paleola, benickiella, wireni) and their corresponding morphological characters (Up, Vr, Dr, etc.) and distribution codes (NFS, DNFSK, etc.).

Subgenus Datomicra Mulsant & Rey, 1874

Table with columns for species names (e.g., zosteræ, nigra, dadopora) and their corresponding morphological characters and distribution codes.

Subgenus Xenota Mulsant & Rey, 1874

Table with columns for species names (myrmecobia) and their corresponding morphological characters and distribution codes.

Subgenus Mycetota Adám, 1987

Table with columns for species names (laticollis) and their corresponding morphological characters and distribution codes.

Subgenus Mocyta Mulsant & Rey, 1874

Table with columns for species names (clientula, orphana, orbata) and their corresponding morphological characters and distribution codes.

Subgenus Lypoglossa Fenyes, 1918

Table with columns for species names (lateralis) and their corresponding morphological characters and distribution codes.

Subgenus Alaobia Thomson, 1858

Table with columns for species names (scapularis, sodalis, gagatina) and their corresponding morphological characters and distribution codes.
